**MORE TRUCKS
MORE SUPPLY
MORE DELIVERIES**

AmeriGas delivers the energy America's agricultural businesses need to get the job done. Servicing the agriculture industry of the United States since 1959, AmeriGas provides safe, reliable, and responsive propane delivery services with low-cost, low emissions benefits, ensuring your business runs smoothly.

As America's leading propane supplier, our nationwide distribution network, Account Managers, Customer Relations Representatives and delivery personnel ensure that you have the propane needed to get the job done. Our local personnel, backed by our national infrastructure, are Driving Every Day.

When compared to diesel or gasoline, propane-fueled equipment can produce fewer harmful emissions, a smaller purchase price, and proven refueling options.

**CUT TIME, CUT COSTS WITH PROPANE
POWERED IRRIGATION SYSTEMS
AND FARM FLEETS**

From crop drying to engine fuel, propane has hundreds of applications across agriculture businesses that will save you time and money! Plus, keep that farm running smoothly with our AccuGas wireless tank monitoring system — alerts arrive to us before it's time for a fill!

Crop Drying & Irrigation Engines Propane-powered drying systems help farmers get better prices for crops that must meet market specifications for moisture content. Propane grain dryers also limit fungus and bacterial growth and can allow farmers to harvest crops with flexibility, even in small spaces with the use of propane cabinet dryers.

Brooding Infrared propane-powered poultry brooders provide more heat and a larger circle of warmth, allowing farmers to decrease the number of brooders needed to keep growing chicks warm and healthy. Additionally, propane heaters and generators allow increased energy production independent of electrical outages.

Greenhouses & Landscaping Greenhouses need consistent, clean heat, and propane solves this problem. With the added benefits of lower fuel costs, portable energy, and cleaner burning fuel, greenhouses and landscaping equipment rely on propane to grow, maintain and protect America's produce.

Safe, Sanitary Services At AmeriGas, our top priority is safety. When we deliver gas to our customers, our trucks are sanitized during disease breakouts, such as the bird flu, to make sure we don't transmit germs from farm to farm. All equipment — yours and ours — is examined to ensure safety requirements are met.
